

Webinar on AI Procurement

Living-in.EU movement 'Digital Transformation the European Way'

Nóirín Ní Earcáin, DG CONNECT

Unit C3 Technologies for smart communities

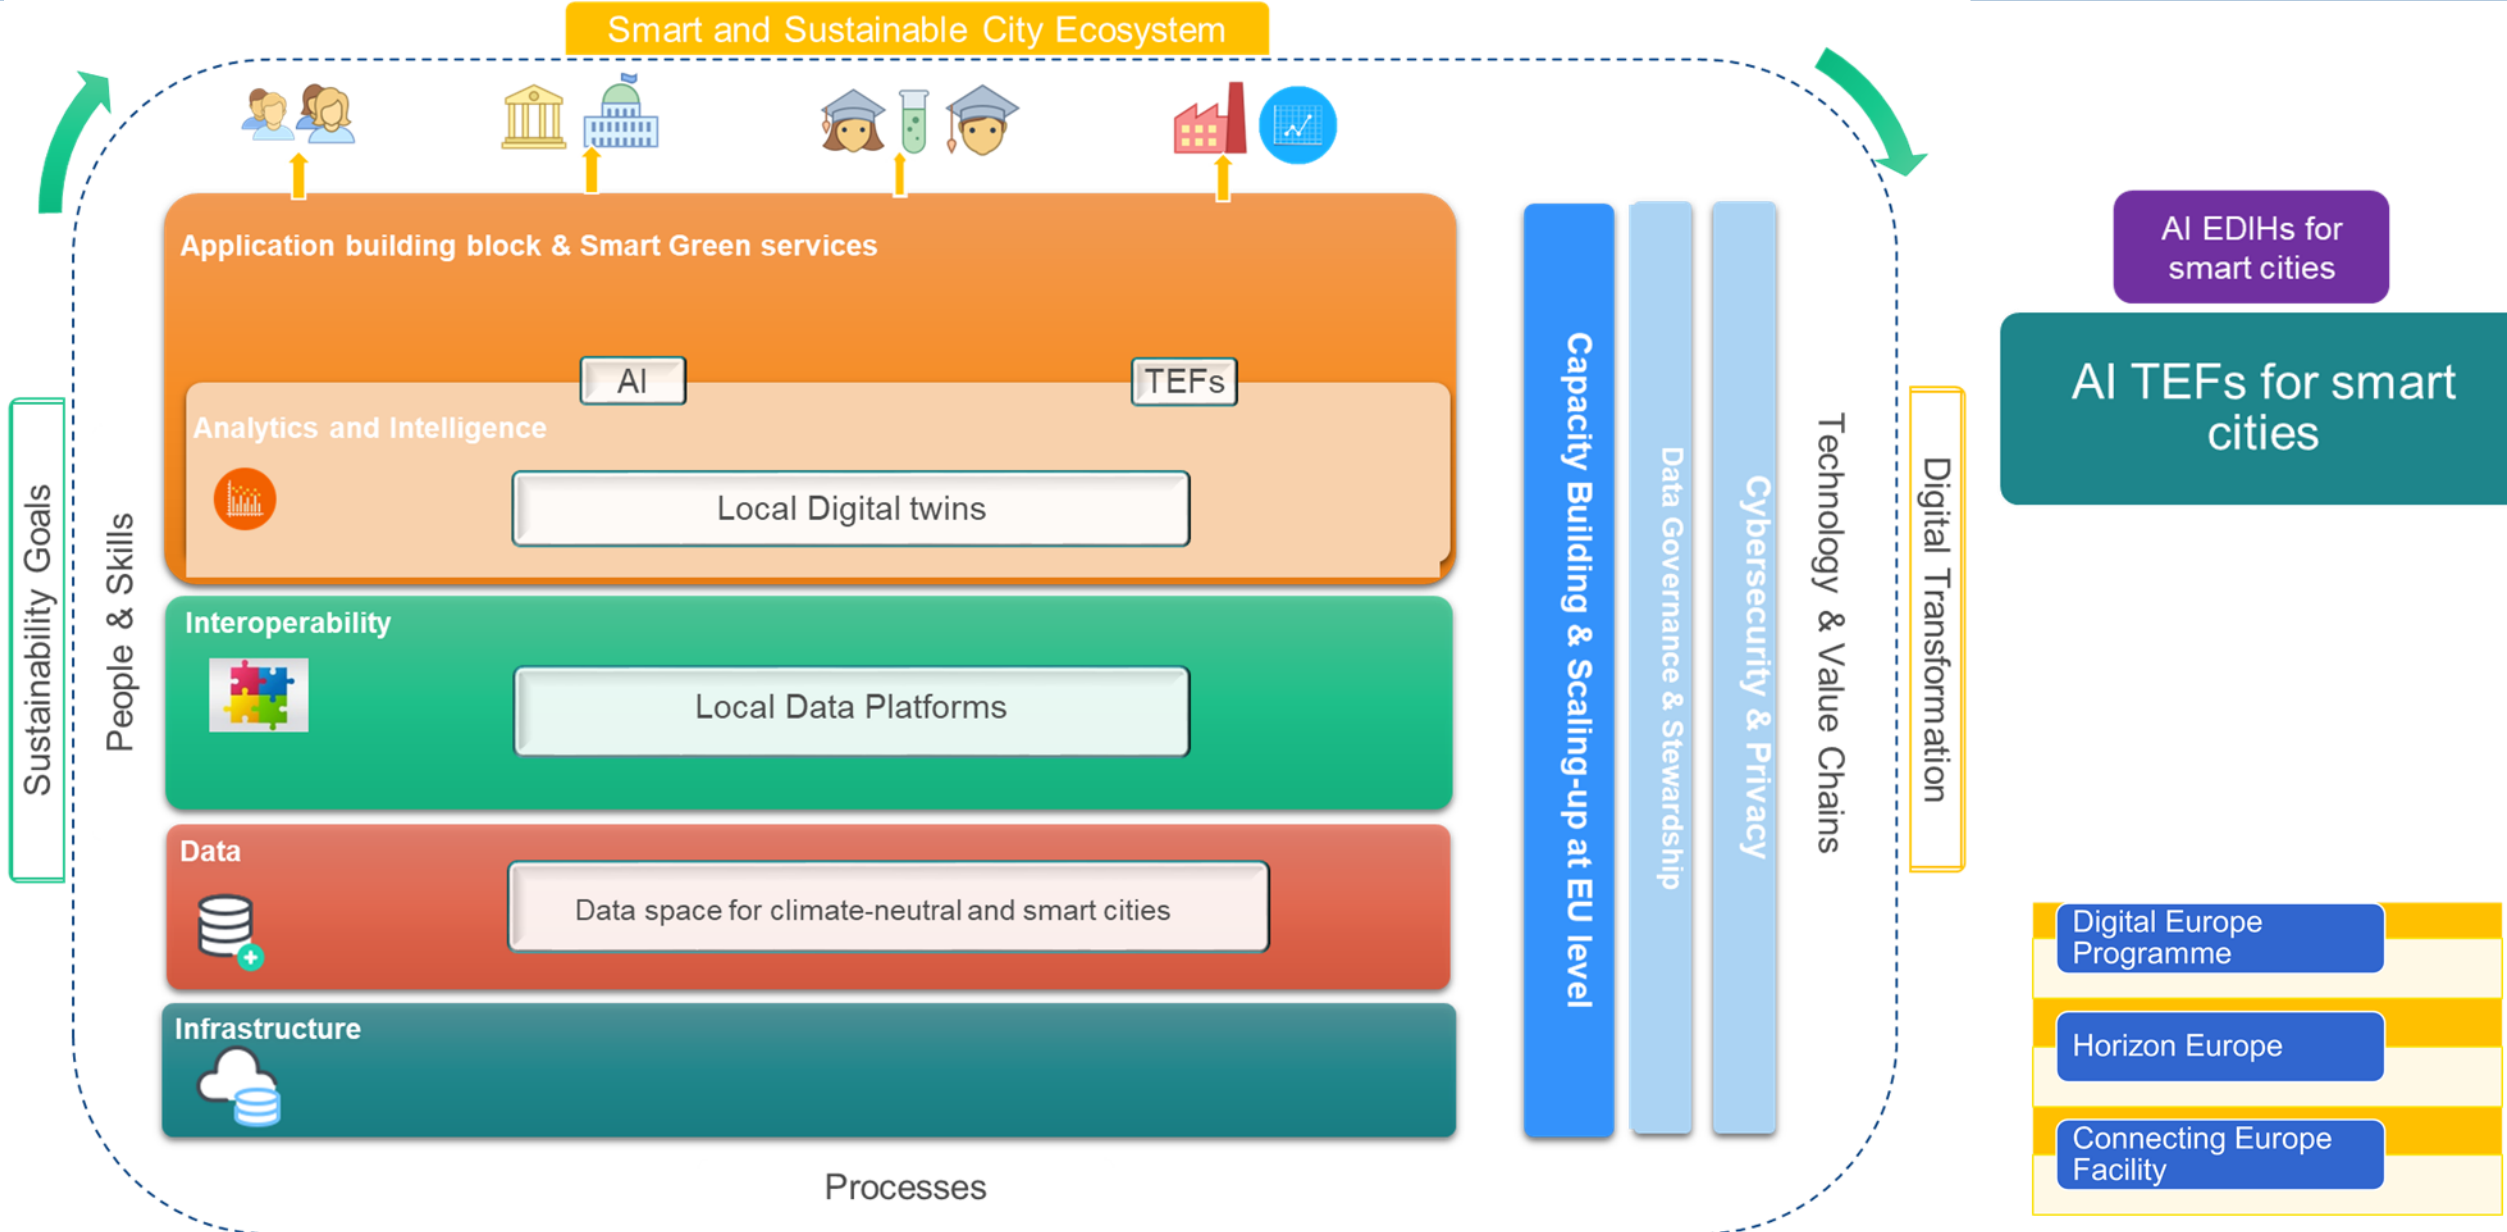

17 May 2022

- EU Green Deal & Europe Fit for the Digital Age: '*Twin green and digital transitions*' ; need to tackle the twin challenge in a holistic and systemic way
- Smart cities and communities use digital technologies to reduce resource input and improve the quality of life for their citizens (- > '*twin digital and green*' transition)
- European Digital Strategy:
 - Shaping Europe's Digital Strategy
 - Excellence and Trust in Artificial Intelligence
 - European Data Strategy
- **2030 Digital Compass: the European way for the Digital Decade**
- EU Recovery Plan:
 - At least 20% of the funds under the Recovery and Resilience Facility will be made available for the digital transition (and 30% for green)

A Europe fit for the digital age

Empowering people with a new generation of technologies

**Smart cities and communities - >
'twin digital and green' transition**

Examples of cities & regions using digital twins

Port of Rotterdam

Helsinki

3D copy of Antwerp

Helsinki, Santander, Flanders

Athens, Berlin, Flanders, Sofia

Madrid, The Hague, Budapest, Lyon, Oslo and Porto

Flanders, Athens, Pilsen

+ Amsterdam, Angers, Gothenburg, Hamburg, Herrenberg, Kongsberg, Munich, Rennes, Stockholm...

LIVING-IN.EU

The European way of digital transformation
in cities and communities

*Over 117 signatures so far... From Mayors, Regional and
national Ministers and around 100 supporters*

<https://www.living-in.eu/>

The European way of digital transformation in cities and communities

- Political Declaration: over 117 signatories, 100 supporters, 5 subgroups, several concrete iconic projects (including on Local Digital Twins)
- Principles:
 - **Citizen-centric approach**
 - **a city-led approach at EU level**
 - **the city as a citizen-driven and open innovation ecosystem**
 - **ethical and socially responsible access, use, sharing and management of data**
 - **technologies as key enablers**
 - **interoperable digital platforms based on open standards and technical specifications, Application Programming Interfaces (APIs) and shared data models**
- Measures:
 - **Financial**
 - **Technical**
 - **Legal**
 - **Education and capacity building**
 - **Measuring and monitoring**

LIVING-IN.EU

The European way of digital transformation in cities and communities

<https://www.living-in.eu/>

... the Commission will...

- continue to support public administrations including cities and communities in **procuring trustworthy AI (1)** by developing a set of minimal capabilities for algorithms to be used in contract conditions through the Living-in.EU movement and by other means
- support public administrations, including cities and communities in creating **AI algorithm registries (2)** to increase citizen trust, and encourage the use of **catalogues of AI-enabled applications (3)** for administrations to increase the take-up of AI by the public sector, for example through the European AI on demand platform

1. **AI Procurement:** Model contractual clauses based on Amsterdam's clauses

Big Buyers Platform (DG GROW) and Living-in.EU

2. **A) AI Registries:** Support the development of common requirements for an AI Registry based (existing examples: Amsterdam and Helsinki)

Eurocities Digital Forum

B) FAIR AI MIM (MIM 5): Minimal interoperability requirements to automate the checking of contractual clauses and presentation of information via an AI Registry

OASC and Living-in.EU

Other developments on AI

- Experimentation, testing, piloting
- Guidance for (innovation) procurement
- Support for public administrations to build skills and capacity (EDIH)
- Monitoring and identifying challenges and opportunities

AI4CITIES

Six European cities and regions are jointly procuring AI solutions on mobility and energy to accelerate carbon neutrality (Pre-Commercial Procurement)

AI DIH network

Framework Cooperation Agreement signed by 25 DIHs

AI Digital Innovation Hubs Network

Adopt AI Programme

AI Testing and Experimentation Facility for smart cities and communities

Digital Forum Lab: Algorithm registries data schema

Contract clauses

Article 5 - Transparency of the Algorithmic System

5.1 On demand of NAME OF ORGANIZATION, the Contractor will provide NAME OF ORGANIZATION with Procedural Transparency. NAME OF ORGANIZATION will be entitled to share the information provided by the Contractor in that context with third parties and to disclose it. On demand of NAME OF ORGANIZATION, the Contractor will complete a register for Algorithmic Systems to be designated by NAME OF ORGANIZATION.

5.2 On demand of NAME OF ORGANIZATION, the Contractor will provide NAME OF ORGANIZATION with Technical Transparency in order to enable NAME OF ORGANIZATION to carry out an audit as referred to in article 8. NAME OF ORGANIZATION will only request and use such information if and to the extent necessary for purposes of article 8. NAME OF ORGANIZATION will, pursuant to article 5.2, keep business-confidential information provided to it confidential and destroy it after an audit as referred to in article 8, unless a legal obligation on the part of NAME OF ORGANIZATION opposes confidentiality or destruction or NAME OF ORGANIZATION needs the information in the context of a dispute with the Contractor or a third party.

5.3 For purposes of article 5.2, the Contractor may choose not to issue the source code of the Algorithmic System to NAME OF ORGANIZATION, but to an independent third party to be designated and engaged by NAME OF ORGANIZATION who will perform the audit referred to in article 8 on behalf of NAME OF ORGANIZATION. Any additional costs incurred as a result will be payable by the Contractor. NAME OF ORGANIZATION may require that the Contractor pay an advance in connection with the costs of the independent third party.

attribute	name	category	type	description	required
name	Name Naam	BASIC INFORMATION ALGEMENE INFORMATIE	string	What is the colloquial name used to identify this algorithm? Example: 'WMO prediction Rotterdam' or 'Crowd-monitoring Enschede'. Wat de naam die gebruikt wordt om dit algoritme aan te duiden? Voorbeeld: 'WMO voorspelling Rotterdam' of 'Crowd-monitoring Enschede'.	true
organization	Organization Organisatie	BASIC INFORMATION ALGEMENE INFORMATIE	string	What is the full name of the organization used to identify responsibility for use of the model, algorithm or AI? Example: 'City of Amsterdam' or 'Water Authority Limburg'. Wat is de volledige naam van de organisatie verantwoordelijk voor de inzet van het model, algoritme of AI? Voorbeeld: 'Gemeente Amsterdam' of 'Waterschap Limburg'.	true
