# Contents

Introduction

Strategic GPP Implementation

Legal Aspects of GPP

Needs assessment

Circular procurement

Market engagement

Indoor Cleaning Services

Computers and Monitors

Food and catering

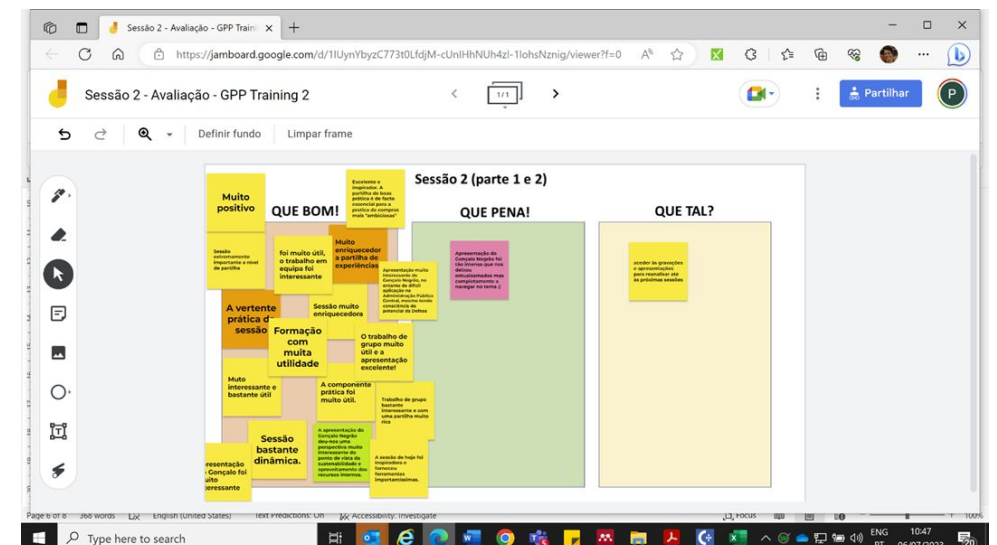

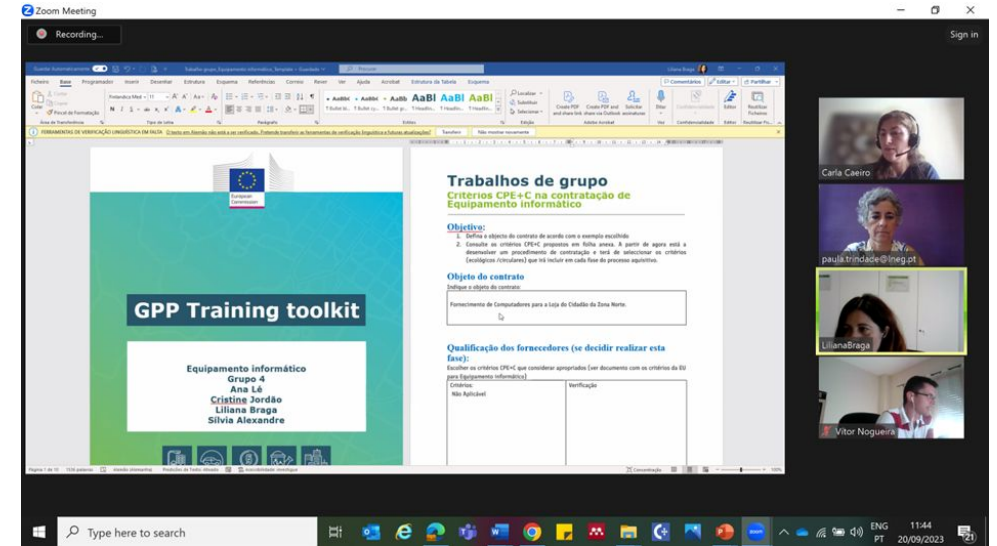

Road transport

Environmental labelling

LCC - Life Cycle Costs

The National Strategy for Green Procurement ECO 360

Developing a Green and Circular Public Procurement Plan

# Lessons learned

---

- Besides the topics covered by the GPP Training Curriculum, some **complementary modules** were added by LNEG that corresponded to **actual training needs** revealed by the trainees – **it is important to perceive trainers needs and expectations!**
- **Hands-on working groups developing tender documents for different product groups.** Each group presented the procurement procedure they worked on and we had a discussion on the results. Participants showed a big deal of interest in this activity, and **working groups allowed people to know each other** and develop collaboration routines outside the training.
- **Interactive activities** using different platforms as mentimeter, jamboard, etc keeps the interest and allows the **collection of feedback**
- Online sessions allowed **participants from all regions** without travel expenses
- Starting by online sessions allowed participants to know each other first and the last sessions, which was face-to-face, allowed people to **go further on interpersonal relationships**

**255 staff**  
**113 researchers**  
**+17 research fellows**

**8 research units**  
**energy | geology**

**3 accredited laboratories**

- > Biofuels and Biomass
- > Materials and Coatings
- > Solar Energy

**Geological resources**

**Geology and geological risk**

**Mineral technology**

**Geo-information**

**Resource economics**

**Energy in the built environment**

**Integration of renewable energies in the energy system**

**Bioenergy and biorefineries**

**Materials for Energy**

**Renewable energies**

## RESOURCE ECONOMICS UNIT

**PROSPECTIVE ANALYSIS OF ENERGY AND GEOLOGICAL RESOURCES TOWARDS DECARBONISATION**
